Improve your Excel® staff planning and make everyone happy

Don't break your head on planning and the checking of schedules. With the Working Time Evaluator (WTE) a module in the Working Time Office® (WTO) this can be achieved easily and quickly via the internet. Your schedule will always be up-to-date and meeting all demands and wishes. The new version is capable of yet more; execute a full schedule. Enter and evaluate all schedule-changes due to sickness, leave, shift-changes and changes of actual working hours.

- Sick leave
- Regular leave
- Public holidays
- Brief absence
- Shift-swapping or -changes
- Confinement periods and on-call-times
- Manual entry of extra shifts
- Deviating break-times
- Automatic allocation of breaks
- Deviating start- or stop-times
- Actual working hours
- Special shifts like:
 - On-call duties
 - Availability services
 - Spare services
- Broken or double shifts
- Cyclic schedules
- Extra workforce contract-data

Invest in Working Time Evaluator and start saving immediately

The WTE is a module of Working Time Office, a comprehensive personnel planning system into Excel® with extended functionality. This also included Working Time Scheduler (WTR) for base schedules, Working Time Absence for holiday cards, Working Time Reports (WTR) for extended hour summary lists and schedule reports. Big savings can be achieved simply by:

- Less sick leave
- Less overtime
- Fewer temp-workers
- Less problems related to nightshifts
- Less outgoing employees
- Less recruitment and training-expenses

Does your organisation comply with all applicable rules?

More and more companies and institutions experience a cultural change and draft compliance guidelines. Out of a feeling of corporate responsibility organisations use this to indicate their wish to comply with rules and regulations. Is your organisation working on a uniform and unambiguous system of registration, that will avoid breaching of rules? In that case Working Time Evaluator will be the ideal and affordable instrument to test and show compliance with rules and regulations.

How does it work?

The Working Time Evaluator is an Add-In for Microsoft® Excel®. You don't need to purchase any new software. It is possible to enter multiple data in the same schedule-cell, these can be: shift-name, shift-code, beginning and ending times of shifts and breaks, special shifts and deviating, actual hours of a realized schedule. Reporting belongs to the standard possibilities.

Modern, reliable and affordable

The Déhora Consultancy Group offers the Working Time Evaluator service via the internet. With a license and yearly service subscription you can use one or more evaluationsets to check schedules. At this moment we have:

- Labour laws
- Labour regulations
- Roster Risk Profile Analysis (Aviation)
- Collective labour agreements
- European Directives
- International Labour Organization Conventions

Trial license or Full license for companies and institutions

Try the WTO yourself, look for more information at www.workingtimeoffice.com. You can also find more information about the other modules of Working Time Office® the Working Time Absence, the Working Time Scheduler and the Working Time Reports modules.
